

## **Relevant information**

Medellin, November 18, 2019

By means of CREG Resolution 154 of 2019, it was decided that EMP file an appeal for reinstatement against the CREG Resolution 101 of 2019, which was confirmed in its entirety.

With the foregoing, the loss of firm energy obligations (FEO) was ratified, with start date as of December 01, 2018 and the assigned FEOs with start date as of December 01, 2021 are maintained.

The direct consequences of this decision are the loss of income associated with such obligations and the execution of a bank guarantee in the amount of USD 43,153,931.

It is worth mentioning that the obligations that are lost under the CREG decision may be partially recovered when the regulator assigns new FEOs.
