

## **Power generation units 3 and 4 of the Hidroituango power plant were included in the All-Risk Material Damages and Lost Profit insurance policy.**

EPM reports to the public:

1. This Tuesday, November 14, 2023, EPM received confirmation of the inclusion of power generation units 3 and 4 of the Hidroituango power plant in the All Risk Material Damage and Lost Profit insurance policy contracted with the insurance company La Previsora Seguros, effective until March 24, 2024 and with an insured limit of USD 250 million.
2. This policy already provided coverage for the completed civil works of the Power Plant, such as the dam, spillway, substation, camps and power generation units 1 and 2. Now, units 3 and 4 are also covered with their respective lost profit.
3. This inclusion was the result of hard work performed jointly by the EPM Group, its insurer and reinsurers.
4. EPM remains committed to managing coverage for the risks associated with Hidroituango with the insurance and reinsurance markets, which is a key infrastructure project for the country's development and the lives of millions of Colombians.
